Copy of para. 4 of Electrical Engineer to Government's Endorsement No.G.125/6397 of 1949, dated 17th November 1949.

....

" 4. A copy of the conditions of supply and miscellaneous charges, together with the form of requisition and the form of written contract or agreement, submitted by the licensee, as required by the proviso to condition 6 of the existing license, is enclosed. The conditions, etc. are generally in order, except that certain miscellaneous charges are rather on the high side. The necessary remarks and suggestions on the proposed miscellaneous charges will be made later on, after the local authority is consulted, as required by section 21(2) of the Indian Electricity Act, 1910."

Copy of para. 3 of Office Note dated 16th December 1949.

" * * * *

3. Para.4 of the El. Engr's note - The copy of the conditions of supply and miscellaneous charges etc. may be forwarded to the Commissioner, Southern Division for remarks.

Para. 5 of the El. Engr's note -- Necessary action regarding the deposited map may be taken at the time of sanctioning amendments to the license."

Copy of para. 4 of Office Note dated 12th July 1950.

" 4. Point (b):- The Commissioner S. D. was asked to consult the local authorities and offer his remarks on the 'conditions of supply' - vide, G.E. No.506/48-El(I), dated the 21-12-1949. His remarks will be found on page of the C.S. The El. Engr.'s attention may be invited to para 4 of his No.G.125/6397, dated the 17-11-1949, and he may be requested to make his suggestions on the conditions etc.", which will be found on pp. X of the C.S."

=====

No. ~~LRM.31~~/ 2140 11975 of 1950.

Bombay,1. ~~December~~ 1950.
2 - 1 - 51

Returned with compliments.

The rates and conditions are checked and it is observed that there is a provision for the rate of temporary supply for lights, fans, etc. as per clause 9 (d) of the license but there does not seem to be any such provision for temporary supply for motive power.

In part II, service and miscellaneous charges, there is special rate provided in Clause 27, both for lighting, fans etc. and motive power. The maximum per unit for lighting is within the maxima stipulated in the License but minimum charge is stipulated in the clause which is not in the License.

Similarly charges mentioned in the above clause for unmetered supply for lighting, etc. as well as charges for meter and unmetered for power are not included in the License. However, these charges appear to be in order looking to the temporary nature of supply.

The other items of the rates and conditions of supply seem to be in order and the undersigned has no further remarks to offer in the matter.

Electrical Engineer to Govt.

L.M.

Original in file LRM 1951 (506/48)

5

Copy of paragraphs 1 & 2 of the office note dated 1st February 1951.

.....

Submitted with ref. to the O. N., dated the 12-7-1950.

2. The Electrical Engineer has checked the rates and conditions of supply of the Madhav Pratap El. Supply Company., Ramdurg. He has pointed out that (1) there is no provision for the rate of temporary supply of motive power and (2) the minimum charge for lighting fans etc. stipulated in clause 7 of part II (Service and Misc. charges) is not provided in the license. Excepting these defects the conditions and miscellaneous charges for supply of energy are considered to be in order. The Commr. S.D. also has no objections to them."

p.55 c/s

2. The miscellaneous charges as proposed by Government are quite reasonable and they are on the lines of those sanctioned in the case of the Kapadwanj Electric License which was granted in 1949. p.57 c/s The reasons put forward by the Company that its capital investments for the undertaking and the expenditure on account of generation and distribution are too high and that the actual monthly revenue is too low to allow it a sufficient margin of profit, cannot be considered as valid grounds for the increase of the miscellaneous charges. The above factors would constitute cogent and substantial basis to determine the reasonable charges for the supply of electrical energy, and if the Company desires to have its rates revised, it should apply to Government for the constitution of a Rating Committee under section 57 of the Electricity(Supply) Act, 1948.

No. L.140/4312 of 1952.

Bombay, 1. 8th JULY 1952.

Returned with compliments.

The reductions in the rates proposed in this office endorsement No.L.140/7685 dated the 11th October 1951 at page 7 ante, were not intended for the rates embodied in the original license, but were modifications to the rates specified in part II "Conditions of Supply & Miscellaneous charges."However the rate of As.12 per unit for temporary supply proposed by the Licensee at item 7(1) (a) may be allowe as the rate for the same purpose sanctioned in the License is Annas ten per unit only. Reductions proposed in the above quoted letter for other items are in order and may be insisted upon.

"

The local authority which was consulted in the matter has no objection to the conditions of the Supply of Electricity etc. being sanctioned except that the metered supply of energy for lights or fans etc., as shown in item 7 of part II are high and opine that they be suitably reduced. At present Rs.0-8-0 are charged per unit of electric supply for lights. There seems no propriety also to charge Rs.5/- p.m. or part of a month when the consumption of energy can be paid for as recorded in meters supplied to consumers.

The copy of conditions of supply and miscellaneous charges, a form of requisition and a form of written contract (pages 3 to 41) received under your reference No.ECL-9 of 7-3-1950 are returned herewith."

MADHAVPRATAP ELECTRIC SUPPLY CO.

RAMDURG.

Conditions and Miscellaneous Charges for the Supply of Energy.

Part I

Conditions of Supply.

1. Application for Supply. (1) An application for the supply of energy shall be made to the licensee in the form of a requisition attached hereto (Annexure A), of which copies are obtainable from the licensee. The requisition shall be signed by the owner or occupier of the premises for which the supply is required. Any assistance or information required in filling up the form will be given to the applicant at the office of the licensee.

(2) If the supply is required for motors the applicant shall state the purpose for which the motors are required, and shall also specify the amount of the current in amperes at full load which may be required for each motor.

(3) A requisition under clause V(4) of the Schedule to the Indian Electricity Act, 1910, requiring the licensee to provide distributing mains throughout a street or part thereof shall be in the form of Annexure C attached hereto.

2. Service Lines. The licensee shall lay free of charge 100 feet of service line from his nearest distributing main outside the limits of the property in respect of which the requisition is made. Any length in excess of 100 feet, as defined above and the whole of the service line within the limits of the property in respect of which the application is made shall be paid for by the applicant

3. Notice for fixing the position of service. Upon receipt of a requisition, notice shall be sent to the consumer or to the wiring contractor acting on the consumer's behalf for his representative to meet the Licensee

Licensee's engineer for the purpose of inspecting the premises and fixing the point of entry of the supply mains and the position of the mains, cut-outs and meters.

4. Quotations, etc., for laying service lines. The position for the service having been agreed upon as provided in condition 3 above, the licensee shall thereafter submit to the applicant a quotation of the estimate of the estimate of the cost of carrying out the work. The quotation having been accepted, the applicant shall be required to deposit the amount of the estimate with the licensee before the service is laid. The deposit having been duly paid, orders shall be issued for the work to be put in hand and the amount so deposited shall be subsequnently adjusted, if necessary, on completion of the figures of the actual cost of the service line. Other conditions being equal, service lines shall as far as possible be laid in the order of the dates of receipt of the deposit money.

Note: The service line, notwithstanding that a portion of the cost has been paid for by the consumer, shall remain the property of the licensee by whom it is to be maintained.

5. Wiring on Consumer's premises. For the protection of the consumer and the public generally, it is necessary that the wiring on the consumer's premises should conform to the Indian Electricity Rules, 1937, and the rules of the Fire Insurance Company in terms of which the building is insured and be carried out by a licensed electrical contractor. As soon as the consumer's installation is completed in all respects and tested by the consumer's contractor, the consumer should submit to the licensee the wiring contractor's completion and test report. A form for this purpose shall be supplied by the licensee. It is important that the conditions named therein are

fully complied with, as otherwise there will be a delay in obtaining the supply.

As required by rule 48 of the Indian Electricity Rules, 1937, no electrical installation work (including additions, alterations, repairs and adjustments to existing installations), except such replacement of lamps, fans, fuses, switches and other component parts of the installation as in no way alters the capacity and character of the installation, shall be carried out upon the premises on behalf of any consumer or owner for the purposes of supply of energy to such consumer or owner, except by an electrical contractor licensed by Government in this behalf and under the direct supervision of a person holding a certificate of competency issued by Government. Any person committing a breach of rule 48 shall render himself liable to punishment under rule 123 of the said Rules.

6. Inspection and testing of installation by the licensee. (a) Upon receipt of the test report the licensee shall notify to the consumer the time and the day when the licensee's representative proposes to inspect and test the installation. It will then be the duty of the consumer to arrange that a representative of the wiring contractor employed by him is present at the inspection to give the licensee or his representative any information required by him concerning the installation.

(b) No connection shall be made until the consumer's installation has been inspected and tested by the licensee and found satisfactory. No charge shall be made for the first test by the licensee, but subsequent tests due to faults found at the initial test shall be charged for in accordance with Part II of these conditions.

3 (c) Before taking the insulation test of the installation the wiring must be complete in every respect. All

fittings such as lamps, fans, cookers, motors, etc., must be connected up, fuses inserted and all switches switched in the "on" position before the tests are carried out. Temporary wires or fittings or dead ends should not be included in the installation and no part of the work should be left incomplete.

(d) The insulation resistance of the entire installation to earth shall be tested from the installation side of the licensee's terminals.

(e) The licensee shall not connect the conductors and fittings on the consumber's premises with his works, unless he is reasonably satisfied that the connection will not at the time of making the connection cause a leakage from those conductors and fittings exceeding one five thousandth part of the maximum supply demanded on the consumer's premises.

7. Extensions and alterations. Should the consumer at any time after the supply of energy has been commenced, desire to increase the number or size of light, fans, motors etc. on his premises, or in any way to alter the position of his wiring therein, notice thereof shall be sent in writing to the licensee whose representative will call and inspect the alteration and, if necessary, change the meters and fuses and alter the service line. Failure to give such notice may derange the supply system and will render the supply liable to be summarily discontinued.

8. Failure of supply. Should at any time the licensee's service fuse or fuses fail, notice thereof should be sent to the licensee's office or if there are sub-stations, to the nearest sub-station. Only authorised employees bearing the badge of the licensee are permitted to replace these fuses in the licensee's cut-outs. Consumers are not allowed to replace these fuses and they will render themselves liable to a heavy penalty if the licensee's seals placed to protect his apparatus are broken. The licensee

19 45 #

does not allow his employees to carry out repairs to the consumer's installation. If the failure of supply is due to any cause other than a fault in the licensee's apparatus the consumer will be charged a fee of Re. 1 for the attendance of the "fuseman" in accordance with Part II of these conditions.

9. Access to premises and apparatus. The licensee's servants are entitled at all reasonable times to enter upon the premises to which energy is supplied for the purpose of reading the meters and for other purposes connected with the apparatus belonging to the licensee.

10. Accuracy of meters. Should the consumer dispute the accuracy of any meter which is not his own property, he may upon giving notice and paying the prescribed fee, have the meter tested by the licensee or the Electric Inspector, Bombay or Poona, in accordance with section 26 of the Indian Electricity Act, 1910. In the event of the meter being tested by the licensee and found to be beyond the limits of accuracy as prescribed, the testing fee shall be returned and the amount of the bill adjusted in accordance with the result of the test taken with respect to the meter readings of the three months prior to the month in which the dispute has arisen, due regard being paid to conditions of occupancy during the month under dispute and during the previous three months. In the event of the test being undertaken by the Electrical Inspector, Bombay or Poona and the meter being found to be incorrect, the period during which the meter shall be deemed to have been incorrect, and the amount of energy supplied to the consumer during this period shall be decided by the Electric Inspector, Bombay or Poona whose decision shall be final.

5 The licensee may remove the meter for the purpose of testing it in his laboratory.

11. Deposits. The consumer may be required by the licensee to enter into a contract in the form of Annexure B hereto appended or make a declaration in lieu of the written contract on one rupee stamp and to make a cash deposit or to give security in Government Promissory Notes or other approved securities for the payment of his monthly bills for energy supplied and for the value of the meter and other apparatus installed on his premises. In the event of no contract having been entered into between the licensee and the consumer, the latter after the supply of energy has once commenced, shall be bound by the terms and conditions of supply herein set forth.

The licensee is prepared to allow interest as follows upon deposits lodged with him against (a) regular payment of energy bills, (b) a reasonable return under clause V and /or VI of the Schedule to the Indian Electricity Act, 1910. In both the above cases deposits must be made in cash if the sum deposited is below Rs. 100 and in cash or Government securities if the sum is Rs. 100 or exceeds that amount. No interest shall be allowed upon deposits below Rs. 50.

On deposits of Rs. 50 or more which may be made in cash, interest shall be allowed at a rate equal to the Post Office Savings Bank rate in force from time to time.

On deposits made in Government securities the interest accruing thereon will be collected preiodically and passed on to the depositer less 2 per cent. which will be retained by the licensee to cover the cost of collection, etc. When Government securities are deposited the amount of the deposit shall be calculated at the current market value of the said securities and not upon their face value. No interest shall be allowed on deposits lodged against the cost of service lines, as the account is only of a temporary nature.

6

12 ~~12~~. Payment of bills. (1) Bills should be paid at the licensee's office within 8 days from the date of their presentation.

(2) Any complaints with regard to the accuracy of the bills shall be made in writing to the licensee and the amounts of such bills shall be paid under protest within the said period of 8 days. The amounts of bills paid under the protest will be regarded as advances to the credit of consumer's account until such time as the bills in dispute have been finally settled.

(3) If the consumer fails to pay any bill presented to him within the said period of 8 days, the licensee shall be at liberty to take action under sub-section (1) of section 24 of the Indian Electricity Act, 1910, and to cut off the supply after giving such consumer not less than 7 days' clear notice in writing without prejudice to his right to recover the amount of the bill by suit. Where, however, any difference or dispute has been referred under the Act to an Electric Inspector before notice as aforesaid has been given by the licensee shall not be at liberty to cut off the supply for failure to pay the bill except where the licensee has made a request in writing to the consumer that the amount in dispute should be deposited with the Electric Inspector and the consumer has failed to comply with such request.

13 ~~14~~. Systems of supply. Supply of energy shall be given from medium pressure distributing mains on the -

Three phase four wire Alternating Current system, 50 cycles, 400 volts, between phase or 230 Volts between each phase and neutral wires.

14 ~~15~~. Classification of Installations:

A.C.System.

(a) 2 wire, single phase 230 volts -

1. General supply not exceeding 10 amps.
2. Motive power installations below 1 B.H.P. in the aggregate.

7

(b) 3, wire phase, 230 volts between phase wires and neutral -
General supply exceeding 10 amps but nut exceeding 20 Amps.

(c) 4 wire, three phase, 230 volts between phase wires and neutral -
General supply exceeding 20 amps.

(d) 3 wire, 3 phase, 400 volts between phases -
Motive power installations of 1 B.H.P. in the aggregate and over.

16. General Wiring Conditions - (a) Mains. - The consumer's mains shall in all cases be brought back to the licensee's point of supply and sufficient cable shall be provided for connecting up with the licensee's apparatus.

(b) Switches and fuses;- The consumer shall provide linked quick break main switches and a single pole fuse on each pole, which shall be fixed as near as possible to the licensee's meter board.

(c) Balance of Installation. If the connected load of any installation exceeds 10 amps at 230 volts, the installation shall be wired on the group system, separate neutral wires being brought back in each case to the licensee's point of supply. An approved form of linked switch (single pole) with two single pole fuses shall control each main circuit. The lamps, fans or any other apparatus of which the installation consists shall be so grouped that under normal ~~apparatus of which the installation consists shall be so grouped that under normal~~ working conditions the current will be balanced and no current will be flowing in the neutral wire.

(d) Medium Pressure Supply.- With medium pressure supply, ie. 250 volts to 650 ~~500~~ volts, the licensee's meter and service cut outs should be enclosed in a strong teak wood box suitably ventilated and provided with a hasp, staple and lock. All wires between which a difference of potential of 250 volts or over exists shall be made inaccessible to unauthorised persons or enclosed in an earthed metallic casing or conduit. A "Caution" Board printed in English and in the Vernacular shall be fixed thereto.

(e) Aerial Mains. -

(e) Aerial Mains.- In order to save the expense of a long underground service on private property, a consumer may, with the licensee's approval, erect a pillar on that portion of his property which is nearest to the licensee's supply mains into which the service shall be laid and from which the consumer shall run overhead mains to his premises. These overhead mains shall constitue a portion of his installation and shall be laid in compliance with the Indian Electricity Rules, 1937. An efficient choking coil and lightning arrestor may be fixed at the commencement ~~of the~~ of the overhead line at the consumer's cost should he desire the same, as an additional protection for his installation.

(f) Earthing: Gas pipes shall on no account be used for earthing purposes. All wiring shall be kept as far as possible from gas and water pipes.

(g) Domestic Heating and Cooking. - A special circuit for heating and cooking shall be run from the licensee's point of supply. Wall plugs used on these circuits shall be of the three pin type, the third pin being an earth connection. Two pin plugs or lighting sockets shall not be allowed.

(h) All plugs shall be switched on the live wire and not on the neutral.

(i) Wiring.- Single leads shall not be run separately in iron conduit.

(J) ~~(i)~~ A.C. Motor Installation. - Motors shall be provided with control gear so as to prevent satisfactorily the maximum current demand from the consumer's installation exceeding the limits given in the following schedule at any time under all possible conditions. Failure to comply with these regulations will render the consumer liable to ddsconnection from the supply on account of interferenfe with the supply to other cosumers:-

9

nature of supply	size of installation.	Limit of maximum current demanded.
Single phase.	upto and including 1 B.H.P.	Six times full load current.
	Above 1 B.H.P. and up to and including 10 B.H.P.	Three times full load current.
Three phase.	Above 10 B.H.P. and upto and including 15 B.H.P.	Twice full-load current
	Above 15 B.H.P.	One and a half time full load current.

Motor circuits shall be controlled by a triple pole switch protected by a no-volt release and T.P. fuses (or overload releases). It is important that the release should be maintained in thorough working order. Wiring for motors shall be run with all three phase wires bunched in a single metallic conduit, which shall be efficiently earthed throughout and connected to the frame of the motor from which two separate earth wires shall be run. The minimum size of the earth wire permitted is No. 10 or 2/14 S.W.G. All motors shall comply in every respect with the Indian Electricity Rules, 1937.

Motor above 1 B.H.P. should be would for 3 phase, 400 volts between phases.

(k) Power factor of apparatus. The apparatus should have a power factor of not less than 80 per cent at normal working loads.

(16). Saving of Rights of Licensee and consumers: Nothing in these conditions shall abridge or prejudice the rights or remedies of the licensee and the consumer under the license, the Indian Electricity Act, 1910, or the Indian Electricity Rules, 1937.

ANNEXURE "A"

FORM OF REQUISITION FOR SUPPLY OF ENERGY CLAUSE VI (5) OF THE SCHEDULE TO THE INDIAN ELECTRICITY ACT 1910.

Note:— Intending consumers are requested to see that this form is fully and clearly filled in and signed.

To, MADHAV PRATAP ELECTRIC SUPPLY Co,
~~THE SATARA ELECTRIC SUPPLY CO, LTD.~~
~~41 BHAVANI PETH, SATARA CITY.~~ RAMDURG.

I/We hereby require you, in accordance with clause VI of the Schedule to the Indian Electricity Act, 1910, within one month or within such longer period as the Electric Inspector may allow, from the date of this requisition, to supply energy for the premises owned/occupied by me/us, and situate within the area of supply specified in the "~~Satara Electric Licence 1933~~" for the following :—

Incandesent Lamps		Punkhas		Plugs, Heaters etc.		Motors		Total Demand.
No.	Wattage each	No.	Wattage each	No.	Wattage each	No.	B. H. P. each	K. W.

Applicant's Name _____

Designation _____

Class of Premises _____ House No. _____

Road _____ Locality _____

This requisition is for :—

(1) A new Service,

The landlord has agreed to my taking the supply of energy and his written authority is enclosed herewith.

(2) A Tapping,

The name and address of the consumer for whom the service was originally laid _____

His ~~Service Consumer~~ No. is _____

The landlord has agreed to my taking the supply of energy and his written authority is enclosed herewith.

(3) Extension to my existing installation from ~~consumer~~ service No.

(4) A re-connection

The previous consumer's name is _____

and his ~~consumer~~ Service No. was _____

(5) A change of name from _____ ~~consumer~~ Service No.

The wiring will be carried out by:—

Name _____

Address _____

Applicant's Signature _____

Present address _____

Date _____

NOTE:—

1. The applicant is requested to complete the clause referring to this requisition and to strike out the clauses which are inapplicable.

2. Under clause VI (1) 1st proviso of the Schedule to the Indian Electricity Act, 1910, the licensee shall not be bound to comply with any such requisition unless and until the person making it:—

(*a*) within fourteen days after the service on him by the licensee of notice in writing in this behalf, tenders to the licensee a written contract in the form approved by the Local Government duly executed and with sufficient security binding himself to take the supply of energy for not less than two years to such amount as will produce at current rates charged by the licensee, a reasonable return to the licensee; and

(*b*) if required by the licensee so to do pays to the licensee the cost of so much of any service line as may be laid down or placed for the purpose of the supply upon the property in respect of which the requisition is made, and so much of any service line as it may be necessary for the said purposes to lay down or place beyond one hundred feet from the licensee's distributing mains although not on that property.

3. No connection will be given to any consumer whose installation has not been carried out by a licensed electrical contractor and under the direct supervision of a competency Certificate holder (*vide* Government notification [Public works Department] No. 620-36-1, dated 28th August 1936 ~~15th November 1936~~).

4. In lieu of the contract referred to in note 2 (*a*) above, the licensee is prepared to accept a declaration in the following form, subject to deposit of any required securities by the applicant:—

Declaration.

I/We hereby declare that I/We desire to have and agree with the licensee to take a supply of energy for the above mentioned purposes for a period not less than two years from the date of commencement of the supply and to be bound by the provisions of clause VI of the Schedule to the Indian Electricity Act, 1910, and by the licensee's charges, rates and conditions of supply as from time to time in force.

One Rupee ~~Anna~~ ~~Revenue~~ Stamp

Applicant's Signature.

a.p.s. 500/2-49

Part II.

Service and Miscellaneous charges.

Charges for Service line. One hundred feet of service line from the distributing main, but not on the property for which a requisition for the supply of energy is received, shall be laid free of charge. The charges for the rest of the service line shall be recovered at the actual cost of the materials and labour plus fifteen per centum on labour to recover supervision charges.

Miscellaneous charges.

1. Connection fee:

(a) Connection fee for every new installation to the supply mains, including the fixing of meters .. Rs. ~~10/-~~ 6-0-0.

(b) If two or more new connections are simultaneously made from the same service, the fee for each additional connection after the first shall be. .. .. Rs. ~~2/-~~ 3-0-0.

2. Reconnection fee for an installation which is disconnected on account -

Vacation of premises or non-payment of accounts or infringement of the conditions of supply. .. Rs. 2/-

Note: If, owing to the staff of the licensee being unable to obtain access to the meter, the disconnection has ~~ha~~ to be made from the mains, either underground or overhead, the consumber shall have to pay all the costs incidental to such disconnection and reconnection.

3. Meters -

(a) Hire of A.C. single phase Meter, per mensem. Rs. ~~0-12-0~~ 0-8-0. per meter.

Hire of 3 wire service or polyphase A.C. meter per mensem. " ~~1-8-0~~ 1-0-0 "

(b) Changing meter for one of a different size when necessitated by a change in the consumer's demand. " 3/- "

(c) Changing the position of the meter board only and when no alteration in service is required the necessary alteration in the consumer's wiring being carried out by a licensed electrical contractor. " ~~5/-~~ 3-0-0 "

12

(d) Charge for attendance of a fuseman. Rs. 0-12-0

(e) Charge for the supply and fixing of an additional meter board. Rs. ~~10/-~~ 5-0-0 each.

(f) Charges for attendance of fuseman at consumer's premises during any function per night. Rs. 5/- per night.

4. Testing -

(a) Installation; The test and inspection prior to connection of a new installation will be carried out free of charge, but should any further test and/or inspection be found necessary owing to any fault in the installation or to non-compliance with the conditions of supply the charge for each additional test shall be Rs. 5/- each time.

(b) Testing of meters under section 26 of the Indian Electricity Act, 1910. In the case of a disputed meter no charge will be made for testing should the meter prove to be outside the limits of error allowed under rule 32 of the Indian Electricity Rules, 1937, otherwise the charge for testing will be. Rs.3/- per meter.

(c) The Licensee undertakes to test and calibrate meters, which are the property of the consumer on payment of a charge of. Rs. 3/- each "

Note: The licensee shall not accept any responsibility, whatsoever for the satisfactory and correct running of the consumer's meter after the owner has taken delivery thereof subsequent to the test.

5. Failure of supply: For restoring connection in cases in which the failure of supply is due to any cause other than a fault in the Licensee's apparatus. Re.1/

6. Security deposits against payment of monthly bills:

When required by the Licensee to do so, the consumer shall deposit security as under -

(1) for lights and fans and all other purposes except motive power, per 0.5 K.W. applied for. Rs. 5/-

(2) for motive power per B.H.P. installed. " 10/-

7. Supply of energy for a temporary period, not covered by clause VI of the Schedule to the Indian Electricity Act, 1910 -

(1)	For lights, Fans. etc.	Maximum rates.
	(a) Metered supply	Rs. ~~12/-~~ per unit with a minimum of Rs. ~~5/-~~ per month or part of a month.
	(b) Unmetered supply	Rs. ~~2/-~~ per K.W. or part thereof of maximum demand per night of 12 hours.

Re.1/- per K.W. or part thereof of maximum demand per night of 6 hours.

(2) For Power:

(a) Metered supply As. 3/- per unit with a minimum of Rs. ~~15~~ 24/- per K.W. of demand per month or part of a month

(b) Unmetered supply Re.1/8 per K.W. or part thereof per day (restricted to 12 hours day supply only).

~~Rxxxxxxxxxxxxxxxxxx~~

8. Service: The actual cost of the service (labour and materials plus 15 per cent on labour for supervision) shall be recovered from the consumer. When the service is removed the labour cost of dismantling shall be charged to the consumer, who will be allowed a credit for all materials returned at the actual cost less 25 per cent. deprececiation for the first month or part thereof, and 3½ per cent for each subsequent month.

Note: The licensee is by no means bound to charge the maximum.

for Madhav Pratap Electric Supply Co.

14

ANNEXURE "B"

An Agreement made this day of One Thousand Nine hundred and ~~forty~~ fifty- between (hereinafter referred to as the "Licensee", which expression shall, unless excluded by or repugnant to the context, be deemed to include his successors and permitted assigns) of the one part and (hereinafter referred to as "the consumer", which expression shall unless excluded by or repugnant to the context include his heirs, executors, administrators and assigns) of the other part.

Whereas the licensee has agreed to supply and the consumer has agreed to take energy at the premises mentioned in the schedule hereto (hereinafter referred to as "the said premises"), subject to the terms and conditions hereinafter contained.

Now it is hereby agreed to by and between the parties hereto as follows:-

1. The licensee shall from the day of 19 and during the continuance of this agreement, supply the consumer with the energy required by him for the purpose and up to the maximum quantity specified in the schedule hereto.

2. The consumer shall pay to the Licensee on demand the cost of so much of any electric supply line as may be laid for the purpose of the supply upon the said premises, and of so much of any electric supply line as it may be necessary to lay for the said purposes in excess of 100 ft. from the Licensee's distributing main, although not on the said premises.

3. The supply shall be registered by a meter or meters in or upon the said premises which the licensee shall provide and keep in order and replace whenever necessary on payment of the monthly rental in force from time to time. The consumer shall be at liberty at any time to purchase another meter or meters and from and after the

purchase thereof the consumer shall be responsible for keeping the same in proper order.

4. The consumer shall pay to the licensee for the energy so supplied and registered as aforesaid at the rates from time to time in force and paid by similar consumers; Provided nevertheless that if at the end of twelve calendar months calculated from the first day of the month following that in which the supply was first commenced and at the end of each subsequent peridd of twelve calendar months during which this Agreement is in force, the registered consumption of energy shall fall short of the value of Rs. being the equivalent of such guaranteed minimum consumption as is specified in the Schedule hereto, the consumer shall pay to the Licensee the difference between the registered consumption and the guaranteed minimum consumption at the rate per Board of trade upit applicable thereto; Provided further that in the event of a minimum consumption not being guaranteed the consumer shall pay to the Licensee for each calendar month during which this Agreement is in force a sum which shall not be less than the Licensee's prescribed minimum monthly charges.

5. Readings of the meter of meters shall be taken by the Licensee once in each month or at such other intervals or times as the Licensee shall deem expedient and the Licensee's meter readers shall have access to the consumer's premises at all reasonable times for the purpose of taking such readings. Payment for energy supplied shall be made by the consumer according to the readings of each meter forthwith upon presentation of a bill therefor.

6. Should the consumer dispute the accuracy of any meter not being his own property, the consumer may upon giving notice and paying the prescribed fee have the meter officially tested by the licensee or the Electric Inspector Bombay/Poona in accordance with section 26 of the Indian Electricity Act, 1910. In the event of the meter being

16

tested by the licensee and found to be beyond the limits of accuracy as prescribed, the testing fee will be returned and the amount adjusted in accordance with the result of the test taken in respect of the meter readings of the three months prior to the month in which the dispute has arisen due regard being paid to conditions of occupancy during the month under dispute and during the previous three months. In the event of the test being undertaken by the Electric Inspector, Bombay/Ooona and the meter being found to be incorrect, the period during which the meter shall be deemed to have been incorrect, and the amount of energy supplied to the consumer during this period shall be decided by the Electric Inspector, Bombay/ Poona.

7. The consumer shall, on receipt of a requisition from the Licensee in this behalf deposit with him the sum of Rs. _____ as security for the purpose next hereinafter mentioned, and shall on a like requisition from time to time renew or replenish such security in the event of the same becoming exhausted or insufficient. The Licensee shall be at liberty at any time and from time to time to appropriate and apply any security so deposited as aforesaid in or towards the payment or satisfaction of all or any moneys which shall become due or owing by the consumer to the Licensee in respect of the supply of energy or otherwise under this Agreement but the provisions in this clause, contained shall not prejudice any other remedy to which the Licensee may be entitled for the recovery of any such moneys. Interest on such deposits shall be paid to the consumer in accordance with the terms laid down in the Licensee's conditions for the supply of energy.

8. This agreement shall be in force for a period of not less than two years in the first instance from the date of commencement of the supply specified in clause 1 and thereafter shall continue from year to year until the agreement is determined as hereinafter provided.

9. The consumer shall not be at liberty save with the consent of the Licensee to determine this Agreement before the expiration of two years from the date of commencement of the supply of energy hereunder. The consumer may determine this Agreement at any time after the said period on giving to the Licensee not less than one calendar month's previous notice in writing in that behalf and upon the expiration of the period of such notice this Agreement shall cease and determine without prejudice to any right which may then have accrued to the Licensee hereunder; Provided always that the consumer may at any time with the previous consent of the Licensee transfer this Agreement to any other person and upon subscription of such transfer this Agreement shall be binding on the transferee and the Licensee and take effect in all respects as if the transferee had originally been a party hereto in place of the consumer who shall thenceforth be discharged from all liability under or in respect thereof.

10. This agreement shall be read and construed as subject in all respect to the provisions of the Ramdurg Electric license, 1947 , and to the provisions of the Indian Electricity Act, 1910, and the rules for the time being in force thereunder as far as the same may respectively be applicable.

The supply of energy under this Agreement is also subject to the following among other provisions of law, namely:-

(i) If the consumer fails within seven days after the date of the service thereof upon him to comply with the terms of any notice in writing by the Licensee requiring him to give security for the purposes mentioned in clause hereof or to renew or replenish any security which may have been given for these purposes but which may have become exhausted or insufficient, the Licensee may discontinue the supply so long such failure continues

(ii) If the consumer adopts any form of lamp or burner or uses the energy supplied or deals with it in any manner so as unduly or improperly to interfere with the efficient supply of enery to any other person by the Licensee, or fails to keep in proper order any meter belonging to him by which the supply is registered, the Licensee may discontinue the supply so long as such lamp or burner is so adapted or the energy is so used or dealt with or the meter is not kept in proper order, as the case may be.

(iii) The Licensee shall not be bound to give or continue the supply if an Electric Inspector or other competent person appointed by the Local Government is satisfied that the electric lines, fittings, works or any other apparatus within the said premises are not in good order and condition and are likely to affect injuriously the use of energy by the Licensee or by other persons. Nor will the Licensee be responsible for any interruption or dimunition in the supply of energy due to occurences beyond his control.

(iv) If the consumer makes any alterations or additions to any electric wires, fittings, works or apparatus belonging to him within the said premises, all such alterations and additions shall be notified to the Licensee by the consumer before being connected to the source of supply with a view to their being examined and tested.

The Schedule Referred to above.

1. Description of the premises.
2. Purposes for which supply is to be given.
3. Maximum quantity of energy required by the consumer
4. Value of guaranteed consumption for each period of twelve calendar months, commencing from the day of 19 .

In witness whereof for and on behalf of the Licensee has/have/set his/their hand/hands and the seal of the Licensee and the consumer has set his hands hereunto the day and year first above written.

Signed, Sealed and Delivered by

for and on behalf of the Licensee.

Signed and Delivered by

the consumer.

Sub:-Elec. supply at Ramdurg:
Conditions of supply and
Misc. charges relating to

Dear Sirs,

I am directed to state that it is considered necy. to amend the Conditions and Misc. Charges for the supply of elec. energy at Ramdurg. The Misc. charges proposed by you in Pt. II, Service and Misc. Charges, against the following items appear to be rather high and it is suggested that they may be reduced as shown below:-

1. Connection fee:

(a) Connection fee, etc.	...	Rs.6/-

Madhav Pratap Electric Supply Co.

RAMDURG (Dist-Bijapur)

Ref. No. ___ ___ ___ Date 9th Nov. 1951.

To,

The Assistant Secretary, to the Govt. of Bombay,
P. W. D. , Bombay.

Sub:- Electric Supply at Ramdurg:
Conditions of Supply and Miscellaneous
Charges relating to -

Dear Sir,

With reference to your letter No. LRM 1651 K dated 25th October 1951, we regret to state that, we differ from you - for the following reasons.

1). We have started our Power House after the end of the last World War, and hence the capital cost of the Machinery such as Generating Sets and Over-head Mains is four times than the Power Houses which are functioning from the pre war days. The - total investment for the above said items is Rs. 2,00,000/- - approximately.

2). We have got two Generating Sets, one International Harvester High Speed,Disel Engine, with 25 K.W. G.E. alternator directly coupled. The above set is working for eight hoursdaily. The total oil consumption per month for the above set is about 400 gallons. The other Generating Set is of Blackstone Engine, 80 H.P., directly coupled with 50 K.W. generator. This set also is working for eight hours per day and the total oil consumption per month is 500 gallons. From the above data you will come to know that the monthly expenses for the oil only are Rs. 1,500/- approximately. We have to pay Rs. 800/- as saliry for the staff which we have maintained for the Power House.

3). The monthly collection from the lighting and power load is Rs. 1,800/- approximately and hence we are running the Power House in loss.

So, taking into consideration the above difficult--ies, you will find that the rates which we have fixed for the consumers are quite low than the other existing Power Houses and hence such we quite unable to give consent to your proposals - mentioned in your letter of the 25th Oct. 1951.

Thanking you in anticipation,

Yours faithfully,

for Madhav Pratap Electric Sy. Co., Ramdurg.

Subject: Electric Supply at Ramdurg:
Conditions of supply and miscellaneous charges relating to - .
....

Dear Sirs,

I am directed to refer to the correce. ending with your letter 57 dated the 9-11-51, on the subject mentioned above, and to state that the miscellaneous charges proposed by Govt. are quite reasonable as they are on the lines of those sanctioned by Govt. in the case of the Kapadwanj Electric License, which was granted in 1949. The reasons put forward by you that your capital investments for the undertaking and the expenditure of generation and distribution are too high and that the actual monthly revenue is too low to allow you a sufficient margin of profit, cannot be considered as valid grounds for the increase of the miscellaneous charges. The above factors would constitute cogent and substantial basis to determine the reasonable charges for the supply of electrical energy. I am, however, to add that if you desire that the rates should be revised, you should apply to Govt. for the constitution of a Rating Committee under Section 57 of the Electricity (Supply) Act, 1948.

2. I am to request the favour of an early reply in the matter.

Yours faithfully,

Asstt.Secy.to the G.of B.,

Sub:- Electric supply at Ramdurg.
Conditions of supply and Misc.
Charges relating to -

Dear Sir,

P-15-N/S

We are in due receipt of your letter No.LRM 1651 K of 7th instant and are thankful to you for the same.

In this connection we desire to inform you that we were granted the necessary license by the Ramdurg State and the same was held good unconditionally by the Bombay State when the Ramdurg State was merged. The conditions which existed at the time when werwere issued the license did not change and therefore we are of opinion that the question of reducing the then fixed rates does not arise. We do not desire to approach the rating Committee as the revision of rates is not necessary.

We trust this explanation is sufficient to give you ground for not altering the condition and terms of license and hope will be considered sympathetically.

Thanking you in the meanwhile,

Yours faithfully,
For Madhav Pratap Elec. Supply Co.,

GOVERNMENT OF BOMBAY

REQUISITION FOR WORK ON THE GOVERNMENT PRESSES

To

THE MANAGER,

Government Central Press, Bombay.

No. ℒRM 1651K. Dated 21st July, 1953.

Reference to previous requisition, if any—No. —— *date* ——

1. Description of work— Conditions and miscellaneous charges for the supply of energy for the Ramdurg Electric License, 1947.
2. Government Authority for printing— Approved under G.R. No. ℒRM 1651, which has not been issued for want of printed copies of the "Conditions and miscellaneous charges for the
3. The Budget Head of account to which cost is debitable (*vide* G.R., G. D., No. 6970 of 10-8-1929) or chargeable as the case may be— "50-C.W-State" for the purpose of Proforma Account
4. Size in which to be printed— Usual booklet size.
5. Style of binding, if any— Usual booklet form of binding.

6. Number of proofs required— one.

7. Date on which proofs are required (in case of urgent work)— 28-7-1953.

8. Number of final copies required— Seventy-five (75).

9. Date on which final copies are required (in case of urgent work)— 4-8-19

10. Classification of the work (whether for official use only, gratis, or for sale) *vide* G. O., G. D., Nos. 1371 and 2185, dated 28-2-1917 and 23-3-1918, respectively, and P-118, dated 29-4-1926 and 14-7-1926— For official use gratis.

11. Edition of the publication— ——

12. Special instructions for Press, if any— ——

Ar. Asst (25-8-53) 25/7

13. After final copies have been supplied, type to be (*a*) kept Standing, (*b*) Distributed— To be distributed.

MADHAVPRATAP ELECTRIC SUPPLY CO., RAMDURG.

Conditions and Miscellaneous Charges for the Supply of Energy.

PART I.

CONDITIONS OF SUPPLY.

1. *Application for Supply.*—(1) An application for the supply of energy shall be made to the licensee in the form of a requisition attached hereto (Annexure A), of which copies are obtainable from the licensee. The requisition shall be signed by the owner or occupier of the premises for which the supply is required. Any assistance or information required in filling up the form will be given to the applicant at the office of the licensee.

(2) If the supply is required for motors the applicant shall state the purpose for which the motors are required, and shall also specify the amount of the current in amperes at full load which may be required for each motor.

(3) A requisition under clause V (4) of the Schedule to the Indian Electricity Act, 1910, requiring the licensee to provide distributing mains throughout a street or part thereof shall be in the form of Annexure C attached hereto.

2. *Service Lines.*—The licensee shall lay free of charge 100 feet of service line from his nearest distributing main outside the limits of the property in respect of which the requisition is made. Any length in excess of 100 feet, as defined above and the whole of the service line within the limits of the property in respect of which the application is made shall be paid for by the applicant.

3. *Notice for fixing the position of service.*—Upon receipt of a requisition, notice shall be sent to the consumer or to the wiring contractor acting on the consumer's behalf for his representative to meet the licensee's engineer for the purpose of inspecting the premises and fixing the point of entry of the supply mains and the position of the mains, cut-outs and meters.

4. *Quotations, etc., for laying service lines.*—The position for the service having been agreed upon as provided in condition 3 above, the licensee shall thereafter submit to the applicant a quotation of the estimate of the cost of carrying out the work. The quotation having been accepted, the applicant shall be required to deposit the amount of the estimate with the licensee before the service is laid. The deposit having been duly paid, orders shall be issued for the work to be put in hand and the amount so deposited shall be subsequently adjusted, if necessary, on completion of the figures of the actual cost of the service line. Other conditions being equal, service lines shall as far as possible be laid in the order of the dates of receipt of the deposit money.

Note.—The service line, notwithstanding that a portion of the cost has been paid for by the consumer, shall remain the property of the licensee by whom it is to be maintained.

5. *Wiring on Consumer's premises.*—For the protection of the consumer and the public generally, it is necessary that the wiring on the consumer's premises should conform to the Indian Electricity Rules, 1937, and the rules of the Fire Insurance Company in terms of which the building is insured and be carried out by a licensed electrical contractor. As soon as the consumer's installation is completed in all respects and tested by the consumer's contractor, the consumer should submit to the licensee the wiring contractor's completion and test report. A form for this purpose shall be supplied by the licensee. It is important that the conditions named therein are fully complied with, as otherwise there will be a delay in obtaining the supply.

As required by rule 48 of the Indian Electricity Rules, 1937, no electrical installation work (including additions, alterations, repairs and adjustments to existing installations), except such replacement of lamps, fans, fuses, switches and other component parts of the installation as in no way alters the capacity and character of the installation, shall be carried out upon the premises on behalf of any consumer or owner for the purposes of supply of energy to such consumer or owner, except by an electrical contractor licensed by Government in this behalf and under the direct supervision of a person holding a certificate of competency issued by Government. Any person committing a breach of rule 48 shall render himself liable to punishment under rule 123 of the said Rules.

6. *Inspection and testing of installation by the licensee.*—(*a*) Upon receipt of the test report the licensee shall notify to the consumer the time and the day when the licensee's representative proposes to inspect and test the installation. It will then be the duty of the consumer to arrange that a representative of the wiring contractor employed by him is present at the inspection to give the licensee or his representative any information required by him concerning the installation.

(b) No connection shall be made until the consumer's installation has been inspected and tested by the licensee and found satisfactory. No charge shall be made for the first test by the licensee, but subsequent tests due to faults found at the initial test shall be charged for in accordance with Part II of these conditions.

(c) Before taking the insulation test of the installation the wiring must be complete in every respect. All fittings such as lamps, fans, cookers, motors, etc., must be connected up, fuses inserted and all switches switched in the "ON" position before the tests are carried out. Temporary wires or fittings or dead ends should not be included in the installation and no part of the work should be left incomplete.

(d) The insulation resistance of the entire installation to earth shall be tested from the installation side of the licensee's terminals.

(e) The licensee shall not connect the conductors and fittings on the consumer's premises with his works, unless he is reasonably satisfied that the connection will not at the time of making the connection cause a leakage from those conductors and fittings exceeding one five thousandth part of the maximum supply demanded on the consumer's premises.

7. *Extensions and alterations.*—Should the consumer at any time after the supply of energy has been commenced, desire to increase the number or size of light, fans, motors, etc., on his premises, or in any way to alter the position of his wiring therein, notice thereof shall be sent in writing to the licensee whose representative will call and inspect the alteration and, if necessary, change the meters and fuses and alter the service line. Failure to give such notice may derange the supply system and will render the supply liable to be summarily discontinued.

8. *Failure of supply.*—Should at any time the licensee's service fuse or fuses fail, notice thereof should be sent to the licensee's office or if there are sub-stations, to the nearest sub-station. Only authorised employees bearing the badge of the licensee are permitted to replace these fuses in the licensee's cut-outs. Consumers are not allowed to replace these fuses and they will render themselves liable to a heavy penalty if the licensee's seals placed to protect his apparatus are broken. The licensee does not allow his employees to carry out repairs to the consumer's installation. If the failure of supply is due to any cause other than a fault in the licensee's apparatus the consumer will be charged a fee of Re. 1 for the attendance of the fuseman in accordance with Part II of these conditions.

9. *Access to premises and apparatus.*—The licensee's servants are entitled at all reasonable times to enter upon the premises to which energy is supplied for the purpose of reading the meters and for other purposes connected with the apparatus belonging to the licensee.

10. *Accuracy of meters.*—Should the consumer dispute the accuracy of any meter which is not his own property, he may upon giving notice and paying the prescribed fee, have the meter tested by the licensee or the Electric Inspector, Bombay or Poona, in accordance with section 26 of the Indian Electricity Act, 1910. In the event of the meter being tested by the licensee and found to be beyond the limits of accuracy as prescribed, the testing fee shall be returned and the amount of the bill adjusted in accordance with the result of the test taken with respect to the meter readings of the three months' period prior to the month in which the dispute has arisen, due regard being paid to conditions of occupancy during the month under dispute and during the previous three months. In the event of the test being undertaken by the Electrical Inspector, Bombay or Poona and the meter being found to be incorrect, the period during which the meter shall be deemed to have been incorrect, and the amount of energy supplied to the consumer during this period shall be decided by the Electric Inspector, Bombay or Poona whose decision shall be final.

The licensee may remove the meter for the purpose of testing it in his laboratory.

11. *Deposits.*—The consumer may be required by the licensee to enter into a contract in the form of Annexure B hereto appended or make a declaration in lieu of the written contract on one rupee stamp and to make a cash deposit or to give security in Government Promissory Notes or other approved securities for the payment of his monthly bills for energy supplied and for the value of the meter and other apparatus installed on his premises. In the event of no contract having been entered into between the licensee and the consumer, the latter after the supply of energy has once commenced, shall be bound by the terms and conditions of supply herein set forth.

The licensee is prepared to allow interest as follows upon deposits lodged with him against (a) regular payment of energy bills, (b) a reasonable return under clause V and/or VI of the Schedule to the Indian Electricity Act, 1910. In both the above cases deposits must be made in cash if the sum deposited is below Rs. 100 and in cash or Government securities if the sum is Rs. 100 or exceeds that amount. No interest shall be allowed upon deposits below Rs. 50.

On deposits of Rs. 50 or more which may be made in cash, interest shall be allowed at a rate equal to the Post Office Savings Bank rate in force from time to time.

On deposits made in Government securities the interest accruing thereon will be collected periodically and passed on to the depositor less 2 per cent. which will be retained by the licensee to cover the cost of collection, etc. When Government securities are deposited, the amount of the deposit shall be calculated at the current market value of the said securities and not upon their face value. No interest shall be allowed on deposits lodged against the cost of service lines, as the account is only of a temporary nature.

12. *Payment of bills.*—(1) Bills should be paid at the licensee's office within 8 days from the date of their presentation.

(2) Any complaints with regard to the accuracy of the bills shall be made in writing to the licensee and the amounts of such bills shall be paid under protest within the said period of 8 days. The amounts of bills paid under the protest will be regarded as advances to the credit of consumer's account until such time as the bills in dispute have been finally settled.

(3) If the consumer fails to pay any bill presented to him within the said period of 8 days, the licensee shall be at liberty to take action under sub-section (*f*) of section 24 of the Indian Electricity Act, 1910, and to cut off the supply after giving such consumer not less than 7 days' clear notice in writing without prejudice to his right to recover the amount of the bill by suit. Where, however, any difference or dispute has been referred under the Act to an Electric Inspector before notice as aforesaid has been given by the licensee shall not be at liberty to cut off the supply for failure to pay the bill except where the licensee has made a request in writing to the consumer that the amount in dispute should be deposited with the Electric Inspector and the consumer has failed to comply with such request.

13. *System of supply.*—Supply of energy shall be given from medium pressure distributing mains on the —

Three phase four wire Alternating Current system, 50 cycles, 400 volts, between phases or 230 volts between each phase and neutral wires.

14. *Classification of Installations* :—

A. C. System.

(*a*) 2 wire, single phase, 230 volts—

1. General supply not exceeding 10 amps.

2. Motive power installations below 1 B.H.P. in the aggregate.

(*b*) 3 wire phase, 230 volts between phase wires and neutral—
General supply exceeding 10 amps but not exceeding 20 amps.

(*c*) 4 wire, three phase, 230 volts between phase wires and neutral—
General supply exceeding 20 amps.

(*d*) 3 wire, 3 phase, 400 volts between phases—
Motive power installations of 1 B.H.P. in the aggregate and over.

15. *General Wiring Conditions*—(*a*) *Mains.*—The consumer's mains shall in all cases be brought back to the licensee's point of supply and sufficient cable shall be provided for connecting up with the licensee's apparatus.

(*b*) *Switches and fuses.*—The consumer shall provide linked quick break main switches and a single pole fuse on each pole, which shall be fixed as near as possible to the licensee's meter board.

(*c*) *Balance of Installation.*—If the connected load of any installation exceeds 10 amps at 230 volts, the installation shall be wired on the group system, separate neutral wires being brought back in each case to the licensee's point of supply. An approved form of linked switch (single pole) with two single pole fuses shall control each main circuit. The lamps, fans or any other apparatus of which the installation consists shall be so grouped that under normal working conditions the current will be balanced and no current will be flowing in the neutral wire.

(*d*) *Medium Pressure Supply.*—With medium pressure supply, i.e., 250 volts to 650 volts, the licensee's meter and service cut-outs should be enclosed in a strong teak wood box suitably ventilated and provided with a hasp, staple and lock. All wires between which a difference of potential of 250 volts or over exists shall be made inaccessible to unauthorised persons or enclosed in an earthed metallic casing or conduit. A "Caution" Board printed in English and in the Vernacular shall be fixed thereto.

(e) *Aerial Mains.*—In order to save the expense of a long underground service on private property, a consumer may, with the licensee's approval, erect a pillar on that portion of his property which is nearest to the licensee's supply mains into which the service shall be laid and from which the consumer shall run overhead mains to his premises. These overhead mains shall constitute a portion of his installation and shall be laid in compliance with the Indian Electricity Rules, 1937. An efficient choking coil and lightening arrestor may be fixed at the commencement of the overhead line at the consumer's cost should he desire the same, as an additional protection for his installation.

(f) *Earthing.*—Gas pipes shall on no account be used for earthing purposes. All wiring shall be kept as far as possible from gas and water pipes.

(g) *Domestic Heating and Cooking.*—A special circuit for heating and cooking shall be run from the licensee's point of supply. Wall plugs used on these circuits shall be of the three pin type, the third pin being an earth connection. Two pin plugs or lighting sockets shall not be allowed.

(h) All plugs shall be switched on the live wire and not on the neutral.

(i) *Wiring.*—Single leads shall not be run separately in iron conduit.

(j) *A.C. Motor Installation.*—Motors shall be provided with control gear so as to prevent satisfactorily the maximum current demand from the consumer's installation exceeding the limits given in the following schedule at any time under all possible conditions. Failure to comply with these regulations will render the consumer liable to disconnection from the supply on account of interference with the supply to other consumers :—

Nature of supply.	Size of installation.	Limit of maximum current demanded.
Single phase ...	Upto and including 1 B.H.P. ...	Six time full load current.
	Above 1 B.H.P. and upto and including 10 B.H.P.	Three times full load current.
Three phase ...	Above 10 B.H.P. and upto and including 15 B.H.P.	Twice full load current.
	Above 15 B.H.P. ...	One and a half time full load current.

Motor circuits shall be controlled by a triple pole switch protected by a no-volt release and T. P. fuses (or overload releases). It is important that the release should be maintained in thorough working order. Wiring for motors shall be run with all three phase wires bunched in a single metallic conduit, which shall be efficiently earthed throughout and connected to the frame of the motor from which two separate earth wires shall be run. The minimum size of the earth wire permitted is No. 10 or 2/14 S. W G. All motors shall comply in every respect with Indian Electricity Rules, 1937.

Motor above 1 B.H.P. should wound for 3 phase, 400 volts between phases.

(k) *Power factor of apparatus.*—The apparatus should have a power factor of not less than 80 per cent. at normal working loads.

16. *Saving of Rights of Licensee and Consumers.*—Nothing in these conditions shall abridge or prejudice the rights or remedies of the licensee and the consumer under the license, the Indian Electricity Act, 1910, or the Indian Electricity Rules, 1937.

ANNEXURE "A".

FORM OF REQUISITION FOR SUPPLY OF ENERGY, CLAUSE VI (5) OF THE SCHEDULE TO THE INDIAN ELECTRICITY ACT, 1910.

Note.—Intending consumers are requested to see that this form is fully and clearly filled in and signed.

To,

MADHAVPRATAP ELECTRIC SUPPLY CO.,
RAMDURG.

I/We hereby require you, in accordance with clause VI of the Schedule to the Indian Electricity Act, 1910, within one month or within such longer period as the Electric Inspector may allow, from the date of this requisition, to supply energy for the premises owned/occupied by me/us, and situate within the area of supply specified in the "Ramdurg Electric License, 1947" for the following :—

Incandescent Lamps.		Punkhas.		Plugs, Heaters, etc.		Motors.		Total Demand.
No.	Wattage each.	No.	Wattage each.	No.	Wattage each.	No.	B.H.P. each.	K.W.

NOTE :—

1. The applicant is requested to complete the clause referring to this requisition and to strike out the clauses which are inapplicable.

2. Under clause VI (1) 1st proviso of the Schedule to the Indian Electricity Act, 1910, the licensee shall not be bound to comply with any such requisition unless and until the person making it—

(*a*) within fourteen days after the service on him by the licensee of notice in writing in this behalf, tenders to the licensee a written contract in the form aproved by the Local Government duly executed and with sufficient security binding himself to take the supply of energy for not less than two years to such amount as will produce at current rates charged by the licensee, a reasonable return to the licensee ; and

(*b*) if required by the licensee so to do, pays to the licensee the cost of so much of any service line as may be laid down or placed for the purpose of the supply upon the property in respect of which the requisition is made, and so much of any service line as it may be necessary for the said purposes to lay down or place beyond one hundred feet from the licensee's distributing mains although not on that property.

3. No connection will be given to any consumer whose installation has not been carried out by a licensed electrical contractor and under the direct supervision of a Competency Certificate holder [*vide* Government Notification (Public Works Department), No. 620-36-1, dated 28th August 1941].

4. In lieu of the contract referred to in note 2 (*a*) above, the licensee is prepared to accept a declaration in the following form, subject to deposit of any required securities by the applicant :—

Declaration.

I/We hereby declare that I/We desire to have and agree with the licensee to take a supply of energy for the above mentioned purposes for a period not less than two years from the date of commencement of the supply and to be bound by the provisions of clause VI of the Schedule to the Indian Electricity Act, 1910, and by the licensee's charges, rates and conditions of supply as from time to time in force.

One Rupee Stamp.

Applicant's Signature.

ANNEXURE "B".

An Agreement made this day of One Thousand Nine Hundred and Fifty between (hereinafter referred to as the "Licensee", which expression shall, unless excluded by or repugnant to the context, be deemed to include his successors and permitted assigns) of the one part and (hereinafter referred to as "the consumer", which expression shall unless excluded by or repugnant to the context include his heirs, executors, administrators and assigns) of the other part.

Whereas the licensee has agreed to supply and the consumer has agreed to take energy at the premises mentioned in the schedule hereto (hereinafter referred to as "the said premises"), subject to the terms and conditions hereinafter contained.

Now, it is hereby agreed to by and between the parties hereto as follows :—

1. The licensee shall from the day of 19 and during the continuance of this agreement, supply the consumer with the energy required by him for the purpose and up to the maximum quantity specified in the schedule hereto.

2. The consumer shall pay to the Licensee on demand the cost of so much of any electric supply line as may be laid for the purpose of the supply upon the said premises, and of so much of any electric supply line as it may be necessary to lay for the said purposes in excess of 100 feet from the Licensee's distributing main, although not on the said premises.

3. The supply shall be registered by a meter or meters in or upon the said premises which the licensee shall provide and keep in order and replace whenever necessary on payment of the monthly rental in force from time to time. The consumer shall be at liberty at any time to purchase another meter or meters and from and after the purchase thereof the consumer shall be responsible for keeping the same in proper order.

4. The consumer shall pay to the licensee for the energy so supplied and registered as aforesaid at the rates from time to time in force and paid by similar consumers ; Provided nevertheless that if at the end of twelve calendar months calculated from the first day of the month following that in which the supply was first commenced and at the end of each subsequent period of twelve calendar months during which this Agreement is in force, the registered consumption of energy shall fall short of the value of Rs. being the equivalent of such guaranteed minimum consumption as is specified in the Schedule hereto, the consumer shall pay to the Licensee the difference between the registered consumption and the guranteed minimum consumption at the rate per Board of trade unit applicable thereto ; Provided further that in the event of a minimum consumption not being guaranteed the consumer shall pay to the Licensee for each calendar month during which this Agreement is in force a sum which shall not be less than the Licensee's prescribed minimum monthly charges.

5. Readings of the meter or meters shall be taken by the Licensee once in each month or at such other intervals or times as the Licensee shall deem expedient and the Licensee's meter readers shall have access to the consumer's premises at all reasonable times for the purpose of taking such readings. Payment for energy supplied shall be made by the consumer according to the readings of each meter forthwith upon presentation of a bill therefor.

6. Should the consumer dispute the accuracy of any meter not being his own property, the consumer may upon giving notice and paying the prescribed fee have the meter officially tested by the licensee or the Electric Inspector Bombay/Poona in accordance with section 26 of the Indian Electricity Act, 1910. In the event of the meter being tested by the licensee and found to be beyond the limits of accuracy as prescribed, the testing fee will be returned and the amount adjusted in accordance with the result of the test taken in respect of the meter readings of the three months prior to the month in which the dispute has arisen due regard being paid to conditions of occupancy during the month under dispute and during the previous three months. In the event of the test being undertaken by the Electric Inspector, Bombay/Poona and the meter being found to be incorrect, the period during which the meter shall be deemed to have been incorrect, and the amount of energy supplied to the consumer during this period shall be decided by the Electric Inspector, Bombay/Poona.

7. The consumer shall, on receipt of a requisition from the Licensee in this behalf deposit with him the sum of Rs. as security for the purpose next hereinafter mentioned, and shall on a like requisition from time to time renew or replenish such security in the event of the same becoming exhausted or insufficient. The Licensee shall be at liberty at any time and from time to time to appropriate and apply any security so deposited as aforesaid in or towards the payment or satisfaction of all or any moneys which shall become due or owing by the consumer to the Licensee in respect of the supply of energy or otherwise under this Agreement but the provisions in this clause, contained shall

not prejudice any other remedy to which the Licensee may be entitled for the recovery of any such moneys. Interest on such deposits shall be paid to the consumer in accordance with the terms laid down in the Licensee's conditions for the supply of energy.

8. This Agreement shall be in force for a period of not less than two years in the first instance from the date of commencement of the supply specified in clause 1 and thereafter shall continue from year to year until the agreement is determined as hereinafter provided.

9. The consumer shall not be at liberty save with the consent of the Licensee to determine this Agreement before the expiration of two years from the date of commencement of the supply of energy hereunder. The consumer may determine this Agreement at any time after the said period on giving to the Licensee not less than one calendar month's previous notice in writing in that behalf and upon the expiration of the period of such notice this Agreement shall cease and determine without prejudice to any right which may then have accrued to the Licensee hereunder; Provided always that the consumer may at any time with the previous consent of the Licensee transfer this Agreement to any other person and upon subscription of such transfer this Agreement shall be binding on the transferee and the Licensee and take effect in all respects as if the transferee had originally been a party hereto in place of the consumer who shall thenceforth be discharged from all liability under or in respect hereof.

10. This Agreement shall be read and construed as subject in all respect to the provisions of the Ramdurg Electric License, 1947, and to the provisions of the Indian Electricity Act, 1910, and the rules for the time being in force thereunder as far as the same may respectively be applicable.

The supply of energy under this Agreement is also subject to the following among other provisions of law, namely :—

(i) If the consumer fails within seven days after the date of the service thereof upon him to comply with the terms of any notice in writing by the Licensee requiring him to give security for the purposes mentioned in clause hereof or to renew or replenish any security which may have been given for these purposes but which may have become exhausted or insufficient, the Licensee may discontinue the supply so long such failure continues.

(ii) If the consumer adopts any form of lamp or burner or uses the energy supplied or deals with it in any manner so as unduly or improperly to interfere with the efficient supply of energy to any other person by the Licensee, or fails to keep in proper order any meter belonging to him by which the supply is registered, the Licensee may discontinue the supply so long as such lamp or burner is so adapted or the energy is so used or dealt with or the meter is not kept in proper order, as the case may be.

(iii) The Licensee shall not be bound to give or continue the supply if an Electric Inspector or other competent person appointed by the Local Government is satisfied that the electric lines, fittings, works or any other apparatus within the said premises are not in good order and condition and are likely to affect injuriously the use of energy by the Licensee or by other persons. Nor will the Licensee be responsible for any interruption or dimunition in the supply of energy due to occurrences beyond his control.

(iv) If the consumer makes any alterations or additions to any electric wires, fittings, works or apparatus belonging to him within the said premises, all such alterations and additions shall be notified to the Licensee by the consumer before being connected to the source of supply with a view to their being examined and tested.

THE SCHEDULE REFERRED TO ABOVE.

1. Description of the premises.
2. Purposes for which supply is to be given.
3. Maximum quantity of energy required by the consumer.
4. Value of guaranteed consumption for each period of twelve calendar months, commencing from the day of 19 .

In witness whereof for and on behalf of the Licensee has/have/set his/their hand/hands and the seal of the Licensee and the consumer has set his hand hereunto the day and year first above written.

Signed, Sealed and Delivered by
for and on behalf of the Licensee.

Signed and Delivered by the
consumer.

ANNEXURE "C".

FORM OF REQUISITION UNDER CLAUSE V (4) OF THE SCHEDULE TO THE INDIAN ELECTRICITY ACT, 1910.

(In the case of six or more owners or occupiers.)

To

THE MANAGER,
The Madhavpratap Electric Supply Co., Ramdurg.

Dear Sir,

We, the undersigned, being owners or occupiers of the premises situated in or upon Street in the town of Ramdurg within the "Area of Supply" specified in the do hereby require you in pursuance of Clause V of the Schedule to the Indian Electricity Act, 1910, to provide within six months from the date of this requisition, distributing mains through the said streets.

Dated at

the day of 195 .

PART II.

SERVICE AND MISCELLANEOUS CHARGES.

Charges for Service line.—One hundred feet of service line from the distributing main, but not on the property for which a requisition for the supply of energy is received, shall be laid free of charge. The charges for the rest of the service line shall be recovered at the actual cost of the materials and labour plus fifteen per centum on labour to recover supervision charges.

Miscellaneous Charges.

1. *Connection fee—*

	Rs. a. p.
(*a*) Connection fee for every new installation to the supply mains, including the fixing of meters ...	6 0 0
(*b*) If two or more new connections are simultaneously made from the same service, the fee for each additional connection after the first shall be ...	3 0 0

2. *Reconnection fee for an installation which is disconnected on account—*

Vacation of premises or non-payment of accounts or infringement of the conditions of supply ...	2 0 0

Note.—If, owing to the staff of the licensee being unable to obtain access to the meter, the disconnection has to be made from the mains, either underground or overhead, the consumer shall have to pay all the costs incidental to such disconnection and reconnection.

3. *Meters—*

	Rs. a. p.	
(*a*) Hire of A. C. single phase meter, per mensem ...	0 8 0	per meter.
Hire of 3 wire service or polyphase A. C. meter per mensem.	1 0 0	per meter.
(*b*) Changing meter for one of a different size when necessitated by a change in the consumer's demand	3 0 0	per meter.
(*c*) Changing the position of the meter board only and when no alteration in service is required the necessary alteration in the consumer's wiring being carried out by a licensed electrical contractor. ...	3 0 0	per meter.
(*d*) Charge for attendance of a fuseman	0 12 0	
(*e*) Charge for the supply and fixing of an additional meter board.	5 0 0	each.
(*f*) Charges for attendance of fuseman at consumer's premises during any function per night ...	5 0 0	per night.

4. *Testing—*

(*a*) *Installation.*—The test and inspection prior to connection of a new installation will be carried out free of charge, but should any further test and/or inspection be found necessary owing to any fault in the installation or to non-compliance with the conditions of supply the charge for each additional test shall be	5 0 0	each time.
(*b*) *Testing of meters under section 26 of the Indian Electricity Act, 1910.*—In the case of a disputed meter no charge will be made for testing should the meter prove to be outside the limits of error allowed under rule 32 of the Indian Electricity Rules, 1937, otherwise the charge for testing will be	3 0 0	per meter.
(*c*) The Licensee undertakes to test and calibrate meters, which are the property of the consumer on payment of a charge of	3 0 0	each meter.

Note.—The licensee shall not accept any responsibility whatsoever for the satisfactory and correct running of the consumer's meter after the owner has taken delivery thereof subsequent to the test.

	Rs. a. p.
5. *Failure of supply.*—For restoring connection in cases in which the failure of supply is due to any cause other than a fault in the Licensee's apparatus ...	1 0 0

123

6. *Security deposits against payment of monthly bills.*—When required by the Licensee to do so, the consumer shall deposit security as under—

	Rs.	a.	p.
(1) for lights and fans and all other purposes except motive power, per 0·5 K. W. applied for ...	5	0	0
(2) for motive power per B. H. P. installed	10	0	0

7. *Supply of energy for a temporary period, not covered by clause VI of the Schedule to the Indian Electricity Act, 1910*—

	Maximum rates.
(1) *For Lights, Fans, etc.*—	
(*a*) *Metered supply*	... As. 12 per unit with a minimum of Rs. 2 per month or part of a month.
(*b*) *Unmetered supply*	... Rs. 2 per K. W. or part thereof of maximum demand per night of 12 hours. Re. 1 per K. W. or part thereof of maximum demand per night of 6 hours.
(2) *For Power*—	
(*a*) *Metered supply*	... As. 3 per unit with a minimum of Rs. 2 per K. W. of demand per month or part of a month.
(*b*) *Unmetered supply*	... Re. 1/8 per K. W. or part thereof per day (restricted to 12 hours day supply only).

8. *Service.*—The actual cost of the service (labour and materials plus 15 per cent. on labour for supervision) shall be recovered from the consumer. When the service is removed the labour cost of dismantling shall be charged to the consumer, who will be allowed credit for all materials returned at the actual cost less 25 per cent. depreciation for the first month or part thereof, and 3½ per cent. for each subsequent month.

Note.—**The licensee is by no means bound to charge the maximum.**

MADHAVPRATAP ELECTRIC SUPPLY CO., RAMDURG.

Conditions and Miscellaneous Charges for the Suppply of Energy.

PART I.

Conditions of Supply.

1. *Application for Supply.*—(1) An application for the supply of energy shall be made to the licensee in the form of a requisition attached hereto (Annexure A), of which copies are obtainable for the licensee. The requisition shall be signed by the owner or occupier of the premises for which the supply is required. Any assistance or information required in filling up the form will be given to the applicant at the office of the licensee.

(2) If the supply is required for motors the applicant shall state the purpose for which the motors are required, and shall also specify the amount of the current in amperes at full load which may be required for each motor.

(3) A requisition under clause V (4) of the Schedule to the Indian Electricity Act, 1910, requiring the licensee to provide distributing mains throughout a street or part thereof shall be in the form of Annexure C attached hereto.

2. *Service Lines.*—The licensee shall lay free of charge 100 feet of service line from his nearest distributing main outside the limits of the property in respect of which the requisition is made. Any length in excess of 100 feet, as defined above and the whole of the service line within the limits of the property in respect of which the application is made shall be paid for by the applicant.

3. *Notice for fixing the position of service.*—Upon receipt of a requisition, notice shall be sent to the consumer or to the wiring contractor acting on the consumer's behalf for his representative to meet the licensee's engineer for the purpose of inspecting the premises and fixing the point of entry of the supply mains and the position of the mains, cut-outs and meters.

4. *Quotations, etc., for laying service lines.*—The position for the service having been agreed upon as provided in condition 3 above, the licensee shall thereafter submit to the applicant a quotation of the estimate of the cost of carrying out the work. The quotation having been accepted, the applicant shall be required to deposit the amount of the estimate with the licensee before the service is laid. The deposit having been duly paid, orders shall be issued for the work to be put in hand and the amount so deposited shall be subsequently adjusted, if necessary, on completion of the figures of the actual cost of the service line. Other conditions being equal, service lines shall as for as possible be laid in the order of the dates of receipt of the deposit money.

Note.—The service line, notwithstanding that a portion of the cost has been paid for by the consumer, shall remain the property of the licensee by whom it is to be maintained.

5. *Wiring on Consumer's premises.*—For the protection of the consumer and the public generally, it is necessary that the wiring on the consumer's premises should conform to the Indian Electricity Rules, 1937, and the rules of the Fire Insurance Company in terms of which the building is insured and be carried out by a licensed electrical contractor. As soon as the consumer's installation is completed in all respects and tested by the consumer's contractor, the consumer should submit to the licensee the wiring contractor's completion and test report. A form for this purpose shall be supplied by the licensee. It is important that the conditions named therein are fully complied with, as otherwise there will be a delay in obtaining the supply.

As required by rule 48 of the Indian Electricity Rules, 1937, no electrical installation work (including additions, alterations, repairs and adjustments to existing installations), except such replacement of lamps fans, fuses, switches and other component parts of the installation as in no way alters the capacity and character of the installation, shall be carried out upon the premises on behalf of any consumer or owner for the purposes of supply of energy to such consumer or owner, except by an electrical contractor licensed by Government in this behalf and under the direct supervision of a person holding a certificate of competency issued by Government. Any person committing a breach of rule 48 shall render himself liable to punishment under rule 123 of the said Rules.

6. *Inspection and testing of installation by the licensee.*—(a) Upon receipt of the test report the licensee shall notify to the consumer the time and the day when the licensee's representative proposes to inspect and test the installation. It will then be the duty of the consumer to arrange that a representative of the wiring contractor employed by him is present at the inspection to give the licensee or his representative any information required by him concerning the installation.

(b) No connection shall be made until the consumer's installation has been inspected and tested by the licensee and found satisfactory. No charge shall be made for the first test by the licensee, but subsequent tests due to faults found at the initial test shall be charged for in accordance with Part II of these conditions.

(c) Before taking the insulation test of the installation the wiring must be complete in every respect. All fittings such as lamps, fans, cookers, motors, etc., must be connected up, fuses inserted and all switches switched in the "ON" position before the tests are carried out. Temporary wires or fittings or dead ends should not be included in the installation and no part of the work should be left incomplete.

(d) The insulation resistance of the entire installation to earth shall be tested from the installation side of the licensee's terminals.

(e) The licensee shall not connect the conductors and fittings on the consumer's premises with his works, unless he is reasonably satisfied that the connection will not at the time of making the connection cause a leakage from those conductors and fittings exceeding one five thousandth part of the maximum supply demanded on the consumer's premises.

7. *Extensions and alterations.*—Should the consumer at any time after the supply of energy has been commenced, desire to increase the number or size of light, fans, motors, etc., on his premises, or in any way to alter the position of his wiring therein, notice thereof shall be sent in writing to the licensee whose representative will call and inspect the alteration and, if necessary, change the meters and fuses and alter the service line. Failure to give such notice may derange the supply system and will render the supply liable to be summarily discontinued.

8. *Failure of supply.*—Should at any time the licensee's service fuse or fuses fail, notice thereof should be sent to the licensee's office or if there are sub-stations, to the nearest sub-station. Only authorised employees bearing the badge of the licensee are permitted to replace these fuses in the licensee's cut-outs. Consumers are not allowed to replace these fuses and they will render themselves liable to a heavy penalty if the licensee's seals placed to protect his apparatus are broken. The licensee does not allow his employees to carry out repairs to the consumer's installation. If the failure of supply is due to any cause other than a fault in the licensee's apparatus the consumer will be charged a fee of Re. 1 for the attendance of the fuseman in accordance with Part II of these conditions.

9. *Access to premises and apparatus.—The* licensee's servants are entitled at all reasonable times to enter upon the premises to which energy is supplied for the purpose of reading the meters and for other purposes connected with the apparatus belonging to the licensee.

10. *Accuracy of meters.*—Should the consumer dispute the accuracy of any meter which is not his own property, he may upon giving notice and paying the prescribed fee, have the meter tested by the licensee or the Electric Inspector, Bombay or Poona, in accordance with section 26 of the Indian Electricity Act, 1910. In the event of the meter being tested by the licensee and found to be beyond the limits of accuracy as prescribed, the testing fee shall be returned and the amount of the bill adjusted in accordance with the result of the test taken with respect to the meter readings of the three months' period prior to the month in which the dispute has arisen, due regard being paid to conditions of occupancy during the month under dispute and during the previous three months. In the event of the test being undertaken by the Electrical Inspector, Bombay or Poona and the meter being found to be incorrect, the period during which the meter shall be deemed to have been incorrect, and the amount of energy supplied to the consumer during this period shall be decided by the Electric Inspector, Bombay or Poona whose decision shall be final.

The licensee may remove the meter for the purpose of testing it in his laboratory.

11. *Deposits.*—The consumer may be required by the licensee to enter into a contract in the form of Annexure B hereto appended or make a declaration in lieu of the written contract on one rupee stamp and to make a cash deposit or to give security in Government Promissory Notes or other approved securities for the payment of his monthly bills for energy supplied and for the value of the meter and other apparatus installed on his premises. In the event of no contract having been entered into between the licensee and the consumer, the latter after the supply of energy has once commenced, shall be bound by the terms and conditions of supply herein set forth.

The licensee is prepared to allow interest as follows upon deposits lodged with him against (*a*) regular payment of energy bills, (*b*) a reasonable return under clause V and/or VI of the Schedule to the Indian Electricity Act, 1910. In both the above cases deposits must be made in cash if the sum deposited is below Rs. 100 and in cash or Government securities if the sum is Rs. 100 or exceeds that amount. No interest shall be allowed upon deposits below Rs. 50.

On deposits of Rs. 50 or more which may be made in cash, interest shall be allowed at a rate equal to the Post Office Savings Bank rate in force from time to time.

On deposits made in Government securities the interest accruing thereon will be collected periodically and passed on to the depositor less 2 per cent. which will be retained by the licensee to cover the cost of collection, etc. When Government securities are deposited the amount of the deposit shall be calculated at the current market value of the said securities and not upon their face value. No interest shall be allowed on deposits lodged against the cost of service lines, as the account is only of a temporary nature.

12. *Payment of bills.*—(1) Bills should be paid at the licensee's office within 8 days from the date of their presentation.

(2) Any complaints with regard to the accuracy of the bills shall be made in writing to the licensee and the amounts of such bills shall be paid under protest within the said period of 8 days. The amounts of bills paid under the protest will be regarded as advances to the credit of consumer's account until such time as the bills in dispute have been finally settled.

(3) If the consumer fails to pay any bill presented to him within the said period of 8 days, the licensee shall be at liberty to take action under sub-section (*1*) of section 24 of the Indian Electricity Act, 1910, and to cut off the supply after giving such consumer not less than 7 days' clear notice in writing without prejudice to his right to recover the amount of the bill by suit. Where, however, any difference or dispute has been referred under the Act to an Electric Inspector before notice as aforesaid has been given by the licensee shall not be at liberty to cut off the supply for failure to pay the bill except where the licensee has made a request in writing to the consumer that the amount in dispute should be deposited with the Electric Inspector and the consumer has failed to comply with such request.

13. *System of supply.*—Supply of energy shall be given from medium pressure distributing mains on the —

Three phase four wire Alternating Current system, 50 cycles, 400 volts, between phases or 230 volts between each phase and neutral wires.

14. *Classification of Installations*

A. C. System.

(a) 2 wire, single phase, 230 volts—

1. General supply not exceeding 10 amps.
2. Motive power installations below 1 B.H.P. in the aggregate.

(*b*) 3 wire phase, 230 volts between phase wires and neutral—
General supply exceeding 10 amps, but not exceeding 20 amps.

(c) 4 wire, three phase, 230 volts between phase wires and neutral—
General supply exceeding 20 amps.

(*d*) 3 wire, 3 phase, 400 volts between phases—
Motive power installations of 1 B. H. P. in the aggregate and over.

15. *General Wiring Conditions*—(*a*) *Mains.*—The consumer's mains shall in all cases be brought back to the licensee's point of supply and sufficient cable shall be provided for connecting up with the licensee's apparatus.

(*b*) *Switches and fuses.*—The consumer shall provide linked quick break main switches and a single pole fuse on each pole, which shall be fixed as near as possible to the licensee's meter board.

(*c*) *Balance of Installation.*—If the connected load of any installation exceeds 10 amps at 230 volts, the installation shall be wired on the group system, separate neutral wires being brought back in each case to the licensee's point of supply. An approved form of linked switch (single pole) with two single pole fuses shall control each main circuit. The lamps, fans or any other apparatus of which the installation consists shall be so grouped that under normal working conditions the current will be balanced and no current will be flowing in the neutral wire.

(*d*) *Medium Pressure Supply.*—With medium pressure supply, i.e., 250 volts to 650 volts, the licensee's meter and service cut-outs should be enclosed in a strong teak wood box suitably ventilated and provided with a hasp, staple and lock. All wires between which a difference of potential of 250 volts or over exists shall be made inaccessible to unanthorised persons enclosed in an earthed metallic casing or conduit. A "Caution" Board printed in English and in the Vernacular shall be fixed thereto.

(*e*) *Aerial Mains.*—In order to save the expense of a long underground service on private property, a consumer may, with the licensee's approval, erect a pillar on that portion of his property which is nearest to the licensee's supply mains into which the service shall be laid and from which the consumer shall run overhead mains to his premises. These overhead mains shall constitute a portion of his installation and shall be laid in compliance with the Indian Electricity Rules, 1937. An efficient choking coil and lightening arrestor, may be fixed at the commencement of the overhead line at the consumer's cost should he desire the same, as an additional protection for his installation.

(*f*) *Earthing.*—Gas pipes shall on no account be used for earthing purposes. All wiring shall be kept as far as possible from gas and water pipes.

(*g*) *Domestic Heating and Cooking.*—A special circuit for heating and cooking shall be run from the licensee's point of supply. Wall plugs used on these circuits shall be of the three pin type, the third pin being an earth connection. Two pin plugs or lighting sockets shall not be allowed.

(*h*) All plugs shall be switched on the live wire and not on the neutral.

(*i*) *Wiring.*—Single leads shall not be run separately in iron conduit.

(J) (*1*) *A.C. Motor Installation.*—Motors shall be provided with control gear so as to prevent satisfactorily the maximum current demand from the consumer's installation exceeding the limits given in the following schedule at any time under all possible conditions. Failure to comply with these regulations will render the consumer liable to disconnection from the supply on account of interference with the supply to other consumers :—

Nature of supply.	Size of installation.	Limit of maximum current demanded.
Single phase ...	Upto and including 1 B.H.P. ...	Six time full load current.
	Above 1 B.H.P. and upto and including 10 B.H.P.	Three times full load current.
Three phase ...	Above 10 B.H.P. and upto and and including 15 B.H.P.	Twice full load current.
	Above 15 B.H.P.	One and a half time full load current.

Motor circuits shall be controlled by a triple pole switch protected by a no-volt release and T. P. fuses (or overload releases). It is important that the release should be maintained in thorough working order. Wiring for motors shall be run with all three phase wires bunched in a single metallic conduit which shall be efficiently earthed throughout and connected to the frame of the motor from which two separate earth wires shall be run. The minimum size of the earth wire permitted is No. 10 or 2/14 S. W G. All motors shall comply in every respect with Indian Electricity Rules, 1937.

Motor above 1 B.H.P. should wound for 3 phase, 400 volts between phases.

(*k*) *Power factor of apparatus.*—The apparatus should have a power factor of not less than 80 per cent. at normal working loads.

(17) *Saving of Rights of Licensee and consumers.*—Nothing in these conditions shall abridge or prejudice the rights or remedies of the licensee and the consumer under the license, the Indian Electricity Act, 1910, or the Indian Electricity Rules, 1937.

NOTE :—

1. The applicant is requested to complete the clause referring to this requisition and to strike out the clauses which are inapplicable.

2. Under clause VI (1) 1st proviso of the Schedule to the Indian Electricity Act, 1910, the licensee shall not be bound to comply with any such requisition unless and until the person making it ;

(*a*) within fourteen days after the service on him by the licensee of notice in writing in this behalf, tenders to the licensee a written contract in the form aproved by the Local Government duly executed and with sufficient security binding himself to take the supply of energy for not less than two years to such amount as will produce at current rates charged by the licensee, a reasonable return to the licensee ; and

(*b*) if required by the licensee so to do, pays to the licensee the cost of so much of any service line as may be laid down or placed for the purpose of the supply upon the property in respect of which the requisition is made, and so much of any service line as it may be necessary for the said purposes to lay down or place beyond one hundred feet from the licensee's distributing mains although not on that property.

3. No connection will be given to any consumer whose installation has not been carried out by a licensed electrical contractor and under the direct supervision of a Competency Certificate holder [*vide* Government Notification (Public Works Department), No. 620-36-1, dated 28th August 1941].

4. In lieu of the contract referred to in note 2 (*a*) above, the licensee is prepared to accept a declaration in the following form, subject to deposit of any required securities by the applicant :—

Declaration.

I/We hereby declare that I/We desire to have and agree with the licensee to take a supply of energy for the above menfioned purposes for a period not less than two years from the date of commencement of the supply and to be bound by the provisions of clause VI of the Schedule to the Indian Electricity Act, 1910, and by the licensee's charges, rates and conditions of supply as from time to time in force.

One Rupee Revenue Stamp.

Applicant's Signature.

PART II.

SERVICE AND MISCELLANEOUS CHARGES.

Charges for Service line.—One hundred feet of service line from the distributing main, but not on the property for which a requisition for the supply of energy is received, shall be laid free of charge. The charges for the rest of the service line shall be recovered at the actual cost of the materials and labour plus fifteen per centum on labour to recover supervision charges.

MISCELLANEOUS CHARGES.

1. Connection fee—

	Rs. a. p.
(*a*) Connection fee for every new installation to the supply mains, including the fixing of meters ...	6 0 0
(*b*) If two or more new connections are simultaneously made from the same service, the fee for each additional connection after the first shall be ...	3 0 0

2. Reconnection fee for an installation which is disconnected on account—

Vacation of premises or non-payment of accounts or infringement of the conditions of supply ..	2 0 0

Note.—If, owing to the staff of the licensee being unable to obtain access to the meter, the disconnection has to be made from the mains, either underground or over-head, the consumer shall have to pay all the costs incidental to such disconnection and reconnection.

3. *Meters*—

	Rs. a. p.	
(*a*) Hire of A. C. single phase meter, per mensem ...	0 8 0	per meter.
Hire of 3 wire service or polyphase A. C. meter per mensem.	1 0 0	per meter.
(*b*) Changing meter for one of a different size when necessitated by a change in the consumer's demand	3 0 0	per meter.
(*c*) Changing the position of the meter board only and when no alteration in service is required the necessary alteration in the consumer's wiring being carried out by a licensed electrical contractor. ...	3 0 0	per meter.
(*d*) Charge for attendance of a fuseman	0 12 0	per meter. delete
(*e*) Charge for the supply and fixing of an additional meter board.	5 0 0	each.
(*f*) Charges for attendance of fuseman at consumer's premises during any function per night ...	5 0 0	per night.

4. *Testing*—

(*a*) *Installation.*—The test and inspection prior to connection of a new installation will be carried out free of charge, but should any further test and/or inspection be found necessary owing to any fault in the installation or to non-compliance with the conditions of supply the charge for each additional test shall	5 0 0	each time.
(*b*) *Testing of meters under section 26 the Indian Electricity Act, 1910.*—In the case of a disputed meter no charge will be made for testing should the meter prove to be outside the limits of error allowed under rule 32 of the Indian Electricity Rules, 1937, otherwise the charge for testing will be	3 0 0	per meter.
(*c*) The Licensee undertakes to test and calibrate meters, which are the property of the consumer on payment of a charge of	3 0 0	each meter

Note.—The licensee shall not accept any responsibility, whatsoever for the satisfactory and correct running of the consumer's meter after the owner has taken delivery thereof subsequent to the test.

5. *Failure of supply.*—For restoring connection in cases in which the failure of supply is due to any cause other than a fault in the Licensee's apparatus ... 1 0 0

6. *Security deposits against payment of monthly bills.*—When required by the Licensee to do so, the consumer shall deposit security as under—

	Rs.	a.	p.
(1) for lights and fans and all other purposes except motive power, per 0·6 K. W. applied for ...	5	0	0
(2) for motive power per B. H. P. installed	10	0	0

7. *Supply of energy for a temporary period, not covered by clause VI of the Schedule to the Indian Electricity Act, 1910*—

	Maximum rates.
(1) *For Lights, Fans, etc.*—	
(a) *Metered supply* ...	As. 12 per unit with a minimum of Rs. 2 per month or part of a month.
(b) *Unmetered supply* ...	Rs. 2 per K. W. or part thereof of maximum demand per night of 12 hours. Re. 1 per K. W. or part thereof of maximum demand per night of 6 hours.
(2) *For Power*—	
(a) *Metered supply* ...	As. 3 per unit with a minimum of Rs. 2 per K. W. of demand per month or part of a month.
(b) *Unmetered supply* ...	Re. 1/8 per K. W. or part thereof per day (restricted to 12 hours day supply only).

8. *Service.*—The actual cost of the service (labour and materials plus 15 per cent. on labour for supervision) shall be recovered from the consumer. When the service is removed the labour cost of dismantling shall be charged to the consumer, who will be allowed credit for all materials returned at the actual cost less 25 per cent. depreciation for the first month or part thereof, and 3½ per cent. for each subsequent month.

Note.—**The licensee is by no means bound to charge the maximum.**

for Madhav Pratap Electric Supply Co.

ANNEXURE "B".

An Agreement made this day of One Thousand Nine Hundred and Fifty between (hereinafter referred to as the "Licensee", which expression shall, unless excluded by or repugnant to the context, be deemed to include his successors and permitted assigns) of the one part and (hereinafter referred to as "the consumer", which expression shall unless excluded by or repugnant to the context include his heirs, executors, administrators and assigns) of the other part.

Whereas the licensee has agreed to supply and the consumer has agreed to take energy at the premises mentioned in the schedule hereto (hereinafter referred to as "the said premises"), subject to the terms and conditions hereinafter contained.

Now it is hereby agreed to by and between the parties hereto as follows :—

1. The licensee shall from the day of 19 and during the continuance of this agreement, supply the consumer with the energy required by him for the purpose and up to the maximum quantity specified in the schedule hereto.

2. The consumer shall pay to the Licensee on demand the cost of so much of any electric supply line as may be laid for the purpose of the supply upon the said premises, and of so much of any electric supply line as it may be necessary to lay for the said purposes in excess of 100 feet from the Licensee's distributing main, although not on the said premises.

3. The supply shall be registered by a meter or meters in or upon the said premises which the licensee shall provide and keep in order and replace whenever necessary on payment of the monthly rental in force from time to time. The consumer shall be at liberty at any time to purchase another meter or meters and from and after the purchase thereof the consumer shall be responsible for keeping the same in proper order.

4. The consumer shall pay to the licensee for the energy so supplied and registered as aforesaid at the rates from time to time in force and paid by similar consumers; Provided nevertheless that if at the end of twelve, calendar months calculated from the first day of the month following that in which the supply was first commenced and at the end of each subsequent period of twelve calendar months during which this Agreement, is in force, the registered consumption of energy shall fall short of the value of Rs. being the equivalent of such guaranteed minimum consumption as is specified in the Schedule hereto, the consumer shall pay to the Licensee the difference between the registered consumption and the guranteed minimum consumption at the rate per Board of trade unit applicable thereto; Provided further that in the event of a minimum consumption not being guaranteed the consumer shall pay to the Licensee for each calendar month during which this Agreement is in force a sum which shall not be less than the Licensee's prescribed minimum monthly charges.

5. Readings of the meter or meters shall be taken by the Licensee once in each month or at such other intervals or times as the Licensee shall deem expedient and the Licensee's meter readers shall have access to the consumer's premises at all reasonable times for the purpose of taking such readings. Payment for energy supplied shall be made by the consumer according to the readings of each meter forwith upon presentation of a bill thereof.

6. Should the consumer dispute the accuracy of any meter not being his own property, the consumer may upon giving notice and paying the prescribed fee have the meter officially tested by the licensee or the Electric Inspector Bombay/Poona in accordance with section 26 of the Indian Electricity Act, 1910. In the event of the meter being tested by the licensee and found to be beyond the limits of accuracy as prescribed, the testing fee will be returned and the amount adjusted in accordance with the result of the test taken in respect of the meter readings of the three months prior to the month in which the dispute has arisen due regard being paid to conditions of occupancy during the month under dispute and during the previous three months. In the event of the test being undertaken by the Electric Inspector, Bombay/Poona and the meter being found to be incorrect, the period during which the meter shall be deemed to have been incorrect, and the amount of energy supplied to the consumer during this period shall be decided by the Electric Inspector, Bombay/Poona.

7. The consumer shall, on receipt of a requisition from the Licensee in this behalf deposit with him the sum of Rs. as security for the purpose next hereinafter mentioned, and shall on a like requisition from time to time renew or replenish such security in the event of the same becoming exhausted or insufficient. The Licensee shall be at liberty at any time and from time to time to appropriate and apply any secvurity so deposited as aforesaid in or towards the payment or satisfaction of all or any moneys which shall become due or owing by the consumer to the Licensee in respect of the supply of energy or otherwise under this Agreement but the provisions in this clause, contained shall

not prejudice any other remedy to which the Licensee may be entitled for the recovery of any such moneys. Interest on such deposits shall be paid to the consumer in accordance with the terms laid down in the Licensee's conditions for the supply of energy.

8. This Agreement shall be in force for a period of not less than two years in the first instance from the date of commencement of the supply specified in clause L and thereafter shall continue from year to year until the agreement is determined as hereinafter provided.

9. The consumer shall not be at liberty save with the consent of the Licensee to determine this Agreement before the expiration of two years from the date of commencement of the supply of energy hereunder. The consumer may determine this Agreement at any time after the said period on giving to the Licensee not less than one calendar month's previous notice in writing in that behalf and upon the expiration of the period of such notice this Agreement shall cease and determine without prejudice to any right which may then have accrued to the Licensee hereunder; Provided always that the consumer may at any time with the previous consent of the Licensee transfer this Agreement to any other person and upon subscription of such transfer this Agreement shall be binding on the transferee and the Licensee and take effect in all respects as if the transferee had originally been a party hereto in place of the consumer who shall thenceforth be discharged from all liability under or in respect hereof.

Ramdurg Mandlan pratap

10. This Agreement shall be read and construed as subject in all respect to the provisions of the Electric License, 194), and to the provisions of the Indian Electricity Act, 1910, and the rules for the time being in force thereunder as far as the same may respectively be applicable.

The supply of energy under this Agreement is also subject to the following among other provisions of law, namely :—

(i) If the consumer fails within seven days after the date of the service thereof upon him to comply with the terms of any notice in writing by the Licensee requiring him to give security for the purposes mentioned in clause hereof or to renew or replenish any security which may have been given for these purposes but which may have become exhausted or insufficient, the Licensee may discontinue the supply so long such failure continues.

(ii) If the consumer adopts any form of lamp or burner or uses the energy supplied or deals with it in any manner so as unduly or improperly to interfere with the efficient supply of energy to any other person by the Licensee, or fails to keep in proper order any meter belonging to him by which the supply is registered, the Licensee may discontinue the supply so long as such lamp or burner is so adapted or the energy is so used or dealt with or the meter is not kept in proper order, as the case may be.

(iii) The Licensee shall not be bound to give or continue the supply if an Electric Inspector or other competent person appointed by the Local Government is satisfied that the electric lines, fittings, works or any other apparatus within the said premises are not in good order and condition and are likely to affect injuriously the use of energy by the Licensee or by other persons. Nor will the Licensee be responsible for any interruption or dimunition in the supply of energy due to occurances beyond his control.

(iv) If the consumer makes any alterations or additions to any electric wires, fittings, works or apparatus belonging to him within the said premises, all such alterations and additions shall be notified to the Licensee by the consumer before being connected to the source of supply, with a view to their being examined and tested.

A

THE SCHEDULE REFERRED TO ABOVE.

1. Description of the premises.
2. Purposes for which supply is to be given.
3. Maximum quantity of energy required by the consumer.
4. Value of guaranteed consumption for each period of twelve calendar months, commencing from the day of 19 .

In witness whereof for and on behalf of the Licensee has/have/set his/their hand/hands and the seal of the Licensee and the consumer has set his hand hereunto the day and year first above written.

Signed, Sealed and Delivered by
for and on behalf of the Licensee.

Signed and Delivered by
the consumer.

ANNEXURE "C".

Form of Requisition under Clause V (4) of he Schedule to the Indian Electricity Act, 1910.

(In the case of six or more owners or occupiers.)

To

THE MANAGER,
